AIR CONTAMINANT DISCHARGE PERMIT

Issued in accordance with provisions of Title 34, Lane Regional Air Pollution Authority's Rules and Regulations, and based on the land use compatibility findings included in the permit record.

Issued To:

Truax Harris Energy LLC, Site #83
Springfield Texaco Station
4124 Main Street
Springfield, Oregon 97477

Land Use Compatibility Statement:

From: City of Springfield
Dated: January 13, 1998

Mailing Address:

15050 SW Koll Parkway, Suite L
Beaverton, Oregon 97006-6028

Fee Basis:

Soil Remediation Plant:
Table A, Part II, 75c

Permit Number: 204413

Permit Type: Letter

SIC: 1779 Soil Remediation Plant

Date Issued: October 18, 1999

Expiration Date: October 17, 2001

Permitted Sources:

1 Air Sparging System
1 Hot Air Extraction System

Issued

By: _____
Barbara J. Cole, Director

Date: _____

PERMITTED ACTIVITIES

1. Until this permit expires or is revoked, the permittee is herewith allowed to discharge air contaminants only in accordance with the permit application and the requirements, limitations, and conditions contained in this permit. This specific listing of requirements, limitations, and conditions does not relieve the permittee from complying with all other rules of Lane Regional Air Pollution Authority (LRAPA).

EMISSION UNIT DESCRIPTION

2. The emission unit regulated by this permit is a soil vapor extraction system.

EMISSION LIMITS AND STANDARDS

3. The total emissions from the soil vapor extraction system shall not exceed the annual Plant Site Emission Limits (PSELS) below. [LRAPA 34-060(4a) & 34-110(5)]

**Annual PSELS
(pounds)**

Source	VOC
Soil Vapor Extraction System	10

4. Particulate emissions shall not exceed 0.1 grain per standard dry cubic foot (dscf) from any air contaminant source constructed or modified after June 1, 1970. [LRAPA 32-015(2)]
5. The permittee shall not cause, suffer, allow, or permit the emission of any air contaminant, excluding uncombined water, into the atmosphere from any air contaminant source for a period or periods aggregating more than three minutes in any one hour which is equal to or greater than 20 percent opacity. [LRAPA 32-010(1)(B)]

PERFORMANCE STANDARDS

6. All air pollution control equipment shall be operated and maintained to meet or exceed manufacturer's specifications in order to ensure that emissions are controlled to the greatest extent possible for the type of control equipment used.

OTHER CONDITIONS

7. Open burning may be allowed subject to the requirements of LRAPA 47-020.
8. Installation or establishment of a new air contaminant source or modification of this permitted source, as defined in Title 12 of LRAPA's Rules and Regulations (R&R), is prohibited without first notifying LRAPA in writing and obtaining approval. If a proposed modification or enlargement of an existing air contaminant source will result in an increase in emissions of air contaminants, a permit modification is also required before the modification occurs.

Application for a modification of this permit must be submitted not less than 60 days prior to the source modification. A filing fee and an application-processing fee are required by Title 34 of LRAPA's R&R and must be submitted with the application.
9. A copy of the permit application and Air Contaminant Discharge Permit must be available on site for inspection upon request.

MONITORING AND RECORD-KEEPING REQUIREMENTS

10. Upset conditions or breakdown of equipment or air pollution control equipment which may result in exceeding the emission limitations specified in this permit must be reported to LRAPA as soon as possible in accordance with Title 36 of LRAPA's Rules and Regulations.
11. LRAPA shall be notified in writing within 30 days after the completion on the project. This notification shall include an estimate of the total BTEX emissions from the air sparging operation and the hot air extraction system.

NOTIFICATION AND REPORTING REQUIREMENTS

12. Unless otherwise specified, notifications required by this permit shall be reported to the following office:
