

MINIMAL AIR CONTAMINANT DISCHARGE PERMIT

Issued by:
Lane Regional Air Pollution Authority
1010 Main Street
Eugene, Oregon 97477
Telephone: 541-736-1056, Toll Free: 877-285-7272
Fax: 541-726-1205
Web Page: www.lrapa.org

ISSUED FOR A SOURCE IN THE FOLLOWING CATEGORY:

Portable/Stationary Rock Crushing Plant
Item 42(c) on Part II of Table A Title 34 (<300,000 tons/year throughput)

PERMIT NUMBER: 207078

EXPIRATION DATE: June 27, 2005

ISSUED TO: Ross Bros. & Company, Inc.

**MAILING ADDRESS: 3501 Brookdale Road North
Salem, Oregon 97303**

Brian L. Jennison, Ph.D., Director

Issuance Date

STATEMENT OF PURPOSE

1. This permit allows the permittee to discharge air contaminants from processes, activities, and insignificant activities related to the air contaminant source(s) listed above until this permit expires, is modified, or is revoked. This specific listing of requirements, limitations and conditions does not relieve the permittee from complying with all other rules of the Authority.
2. **This permit is not valid outside of Lane County** nor at any location where the operation of the rock crusher by the permittee would be in violation of any local land use or zoning laws. It is the permittee's sole responsibility to obtain all local land use approvals as, or where, applicable before operating the plant at any location.

GENERAL PERFORMANCE AND EMISSION STANDARDS

3. The permittee must not use any fuel oil containing more than:
 - a. 0.3 % sulfur by weight for ASTM Grade 1 (distillate)
 - b. 0.5% sulfur by weight for ASTM Grade 2 (distillate)

Particulate Matter Standards

4. The visible emissions excluding uncombined water from any air contaminant source shall not equal or exceed 20% opacity for an aggregate period of no more than 3 minutes in any one hour period.
5. The permittee is prohibited from depositing particulate matter larger than 250 microns in diameter upon the real property of another person.
6. The permittee shall control fugitive dust emissions by:
 - a. Enforcing reduced traffic speed and treatment of haul roads with water, dust suppressants, or sweeping;
 - b. Operation of water sprays on material transfer and conveyance points;
 - c. Treating storage piles, as necessary; and
 - d. Prompt removal of "tracked out" material from paved streets.
7. The permittee must not create unusual or annoying amounts of fugitive emissions. Nuisance conditions will be determined by the Authority. The creation of nuisance conditions may, in addition to other action the Authority may take, result in revocation of this permit and assignment to a regular permit to include a compliance schedule to control the nuisance

condition.

Equipment Maintenance and Process Efficiency

8. The permittee must at all times maintain and operate all air contaminant generating processes and all contaminant control equipment at full efficiency and effectiveness, such that the emissions of air contaminants are kept at the lowest practicable levels.

Special Conditions

9. The permittee must not install or operate the facility at any new site without first providing written notice by mail or facsimile to the Authority. The written notice must be submitted 7 days prior to relocating the plant and include the date of the proposed move, approximate dates of operation, a detailed map showing access to the new site, and a description of the air pollution controls and procedures if changed from the previous location.
10. The permittee shall record the plant's total production at each operating location. These records will be made available to Authority staff pursuant to Condition 14 of this permit.
11. The total amount of No. 2 fuel utilized per year in Lane County shall not exceed 17,860 gallons.

Open Burning

12. The permittee may not conduct any open burning except as allowed by Title 47 of Authority Rules.

Monitoring and Record Keeping

13. The permittee shall keep records of the operational and maintenance parameters listed below, if operating the crushing equipment at a site within Lane County. The records must be retained for a period of two years.
 - a. Amount of rock crushed monthly, in tons
 - b. Number of hours of crusher operation, recorded daily
 - d. Number of hours of operation for each generator, recorded daily.
 - e. Type and quantity of fuel utilized by generators used to power the crusher in gallons, per year.
 - f. Maintenance performed on any air pollution control equipment

SUBMITTALS

Fees

13. The permittee will be invoiced for the renewal fees (Filing Fee, Application Processing Fee, and Compliance Determination Fee) in the month prior to expiration of this permit.

Reports

14. The permittee shall submit to the Authority by February 1 of each year a report containing the following information for the previous calendar year for operations within Lane County.
 - a. Total amount of each type of fuel used during the year to power the generator(s). (gal)
 - b. Total number of hours each generator was operated. (hr)
 - c. Total amount of crushed rock produced. (ton)
 - d. Average hourly production of crushed rock. Hourly production shall be calculated by dividing total amount of rock crushed during the year by the total number of hours of operation of the crushing equipment. (ton/hr)
15. The permittee must notify the Authority 60 days before adding new, or modifying existing equipment to the extent that process equipment is substantially changed or added to, or emissions are significantly changed or increased. The Authority will determine whether a change to the permit is required. An application to modify the permit, if necessary, must include payment of the appropriate fees.
16. The permittee must promptly notify the Authority of any change of mailing address, company name, or plant ownership. The permit will expire 60 days after a change in the legal entity owning/operating the facility unless application, with appropriate fees, is made to transfer the permit to the new entity.

ON-SITE INSPECTIONS

17. The permittee must allow the Authority's representatives access to the plant site and pertinent records at all reasonable times for the purposes of performing inspections, surveys, collecting samples, obtaining data, reviewing and copying air contaminant emissions discharge records and conducting all necessary functions related to this permit in accordance with ORS 468.095.

18. The permittee must have a copy of the permit available at the crusher location at all times.

QUALIFICATION FOR ASSIGNMENT TO MINIMAL PERMIT

19. The Authority has determined that this source has minimal emissions, insignificant impact on air quality in the area, and creates no nuisance conditions of any kind. If changes in annual operations result in increased emissions, the permittee must notify the Authority and may be required to obtain a regular Air Contaminant Discharge Permit. This would result in requirements for annual inspections and annual fees.
20. This permit is subject to revocation for cause as provided in Authority Rules.

LEGAL DISCLAIMERS

21. The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.
22. In addition to the specific requirements listed in this permit, the permittee shall comply with all other legal requirements enforceable by the Authority.
