

Lane Regional Air Pollution Authority
Air Contaminant Discharge Permit Amendment

REVIEW REPORT AMENDMENT

Company: Whittier Wood Products Co.
Permit No.: 208894

The modification of the ACDP for Whittier Wood Products has been initiated by LRAPA in order to change the form of the synthetic minor limits and associated recordkeeping to make them practically-enforceable. Specifically, the time period for the emission limits for VOC and HAPs have been changed from calendar year limits to consecutive 12-month limits. In addition, the methodology for demonstrating compliance with the synthetic minor limits has been simplified and generalized. No emission limits have been changed because of this permitting action.
