SIMPLE
AIR CONTAMINANT DISCHARGE PERMIT

Issued in accordance with provisions of Title 34, Lane Regional Air Protection Agency's Rules and Regulations, and based on the land use compatibility findings included in the permit record.

Issued To:

Willamette Valley Sandblasting
1250 South Bertelsen Road
Eugene, Oregon 97402

Land Use Compatibility Statement:

From: City of Eugene
Dated: October 8, 2001

Mailing Address:

P.O. Box 21237
Eugene, OR 97402

Fee Basis:

Title 37, Table 1:
Part B: 74
All Other Sources not listed herein that LRAPA determines an air quality concern exists or one which would emit significant malodorous emissions

Permit Number: 208932

Permit Type: Simple "Low"

SIC: 1799

Date Renewed: February 21, 2007

Expiration Date: February 20, 2012

Permitted Sources:

Sandblasting

Issued By:

Merlyn L. Hough, Director

Effective Date:

May 11, 2009

ADDENDUM NO. 1
Administrative Amendment

In accordance with Section 37-0084 Air Contaminant Discharge Permit No. 208932 is hereby amended to change the permit type and fee basis on the cover page in accordance with Title 37 of LRAPA's Rules and Regulations.

**MINIMAL
AIR CONTAMINANT DISCHARGE PERMIT**

This permit is being issued in accordance with provisions of Title 34,
Lane Regional Air Protection Agency's Rules and Regulations, and based
on the land use compatibility findings included in the permit record.

Issued To:

Willamette Valley Sandblasting

1250 South Bertelsen Road

Eugene, Oregon 97402

Land Use Compatibility Statement:

From: City of Eugene

Dated: October 8, 2001

Mailing Address:

P.O. Box 21327

Eugene, OR 97402

Fee Basis:

Table A, Part II

63c Unlisted Source of Marginal Concern

Permit Number: 208932

Permit Type: Minimal

SIC: 1799

Date Issued: February 21, 2007

Expiration Date: February 20, 2012

Permitted Sources:

Sandblasting Operation

Issued

By: _____
Merlyn L. Hough, Director

Effective

Date: _____

STATEMENT OF PURPOSE

1. This permit allows the permittee to discharge air contaminants from processes, activities, and insignificant activities related to the permitted source(s) listed above until this permit expires, is modified, or is revoked.

GENERAL PERFORMANCE AND EMISSION STANDARDS

Site Specific Authorization

2. This permit is site specific and is valid only at 1250 S. Bertelsen, Eugene, Oregon except as provided by the condition below.
3. The permittee shall notify LRAPA (736-1056) no less than 24 hours in advance of performing any contract abrasive blasting at locations other than 1250 S. Bertelsen. Advance notification requirements may be reduced to a 1 hour minimum for those blasting locations provided in a list including location, property owner, and address. The advance notification shall be submitted 60 days after issuance of this permit and February 15th of each calendar year thereafter. The 24 hour notification requirement may be waived if the permittee receives a request for sandblasting without 24 hours advance notice. In such cases, the permittee shall notify LRAPA within 15 minutes of receipt of each request.

Particulate Matter (PM) Standards

4. The permittee shall not cause, suffer, allow, or permit the emission of any air contaminant, excluding uncombined water, into the atmosphere from any air contaminant source for a period or periods aggregating more than three (3) minutes in any one (1) hour which is equal to or greater than 20 percent opacity.
5. Particulate emissions shall not exceed 0.1 grain per standard dry cubic foot (dscf) from any air contaminant source constructed or modified after June 1, 1970.
6. The permittee shall utilize reasonable precautions to prevent fugitive dust from becoming airborne. Such precautions shall include, but not be limited to, the following:
 - a. Application of asphalt, approved road oil, water, or other suitable chemicals on unpaved roads, material stockpiles, and other surfaces which can create airborne dusts;
 - b. Full or partial enclosure of materials stockpiles in cases where application of oil, water or chemicals is not sufficient to prevent particulate matter from becoming airborne;
 - c. Adequate containment during sandblasting or other similar operations;
 - d. The prompt removal from paved streets of earth or other material which does or may become airborne.
7. The permittee shall not allow the emissions of odorous or other fugitive emission so as to create nuisance conditions off the permittee's property. Nuisance conditions will be verified by LRAPA personnel. The creation of nuisance conditions may result in a permit modification to require a compliance schedule to control the nuisance condition.

Equipment Maintenance and Process Efficiency

8. The permittee shall at all times maintain and operate all air contaminant generating processes and all contaminant control equipment at full efficiency and effectiveness such that the emissions of air contaminants are kept at the lowest practicable levels.

Open Burning

9. The permittee may not conduct any open burning except as authorized in Title 47 of LRAPA=s Rules and Regulations.

SUBMITTALS

Fees

10. The permittee will be invoiced for the renewal fees (Filing Fee, Application Processing Fee, and Compliance Determination Fee) in the month prior to expiration of this permit.

Reports

11. The permittee shall notify LRAPA before adding new or modifying existing equipment. LRAPA will determine whether a change to the permit is required. An application to modify the permit, if necessary, must include payment of the appropriate fees.
12. The permittee shall notify LRAPA of any change of mailing address, company name, or plant ownership. The permit will expire 60 days after a change in the legal entity owning/operating the facility unless application, with appropriate fees, is made to transfer the permit to the new entity.

ON-SITE INSPECTIONS

13. The permittee shall allow LRAPA representatives access to the plant site and pertinent records at all reasonable times for the purposes of performing inspections, surveys, collecting samples, obtaining data, reviewing and copying air contaminant emissions discharge records, and conducting necessary functions related to this permit.
14. The permittee shall have a copy of the permit available at the facility at all times.

RECORDKEEPING

15. The permittee shall record the lbs of sand purchased per calendar year.

MINIMAL SOURCE STATUS

16. LRAPA has determined that this source has minimal emissions, insignificant impact on air quality in the area, and creates no air quality nuisance conditions. If changes in annual operations result in increased emissions, the permittee must notify LRAPA and may be required to obtain a *Regular* Air Contaminant Discharge Permit. This would result in requirements for annual inspections and annual fees.

LEGAL DISCLAIMERS

17. The issuance of this permit does not convey any property rights in either real or personal property or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.
18. In addition to the specific requirements listed in this permit, the permittee shall comply with all other legal requirements enforceable by LRAPA.

ALL INQUIRIES REGARDING THIS PERMIT SHOULD BE DIRECTED TO:

GENERAL PERMIT CONDITIONS

General Conditions and Disclaimers

- G1. A copy of the permit application and this Air Contaminant Discharge Permit (ACDP) must be available on site for inspection upon request.
- G2. The permittee shall allow the Director or his/her authorized representatives access to the plant site and pertinent records at all reasonable times for the purpose of making inspections, surveys, collecting samples, obtaining data, reviewing and copying air contaminant discharge records and otherwise conducting necessary functions related to this permit in accordance with ORS 468.095. [LRAPA 13-020(1)(h)]
- G3. The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.

Performance Standards and Emission Limits

- G4. The permittee shall not cause or permit the emissions of any particulate matter which is greater than 250 microns in size if such particulate matter does or will deposit upon the real property of another person. [LRAPA 32-055]
- G5. The permittee shall not discharge from any source whatsoever such quantities of air contamination which cause injury, detriment, public nuisance or annoyance to any persons or to the public or which cause injury or damage to business or property; such determination to be made by the Agency. [LRAPA 32-090(1)]
- G6. The permittee shall not cause or permit emission of water vapor if the water vapor causes or tends to cause detriment to the health, safety or welfare of any person or causes, or tends to cause damage to property or business. [LRAPA 32-090(2)]
- G7. The permittee shall not willfully cause or permit the installation or use of any device or use of any means which, without resulting in a reduction in the total amount of air contaminants emitted, conceals emissions of air contaminants which would otherwise violate LRAPA rules. [LRAPA 33-030(1)]
- G8. The permittee shall not cause or permit the installation or use of any device or use of any means designed to mask the emissions of an air contaminant which causes or tends to cause detriment to health, safety or welfare of any person. [LRAPA 33-030(2)]
- G9. The permittee shall not allow any materials to be handled, transported, or stored; or a building, its appurtenances or road(s) to be used, constructed, altered, repaired, or demolished; or any equipment to be operated, without taking reasonable precautions to prevent particulate matter from being airborne. [LRAPA 48-015(2)]
- G10. The permittee shall not cause or permit the emissions of odorous matter in such a manner as to cause a public nuisance. [LRAPA 49-010(1)]

Excess Emissions: General Policy

- G11. Emissions of air contaminants in excess of applicable standards or permit conditions are considered unauthorized and are subject to enforcement action, pursuant to LRAPA 36-010 and 36-030. These rules apply to any permittee operating a source which emits air contaminants in

violation of any applicable air quality rule or permit condition resulting from the breakdown of air pollution control equipment or operating equipment, process upset, startup, shutdown, or scheduled maintenance. [LRAPA 32-001(1)]

Excess Emissions: Notification and Record-keeping

- G12. The permittee must immediately (i.e., as soon as possible, but in no case more than one (1) hour after the beginning of the excess emissions period) notify LRAPA by telephone or in person of all cases of excess emissions due to upset or breakdown. [LRAPA 36-020(1)] Notification shall include:
- a) source name;
 - b) nature of the emissions problem;
 - c) name of the person making the report;
 - d) name and telephone number of the contact person for further information;
 - e) date and time of the onset of the upset condition;
 - f) whether or not the incident was planned;
 - g) equipment involved in the upset or breakdown;
 - h) estimated type and quantity of excess emissions;
 - i) estimated time of return to normal operations;
 - j) efforts made to minimize emissions; and
 - k) description of remedial actions to be taken.

Notification shall be made to the LRAPA office. The current LRAPA telephone number during regular business hours (8 a.m. - 5 p.m., M-F) is (541) 736-1056. During nonbusiness hours, weekends, or holidays, the permittee shall immediately notify LRAPA by calling the LRAPA Upset/Complaint Line. The current number is (541) 726-1930.

Follow-up reporting, if required by LRAPA, shall contain all information required by Condition G15.

- G13. At each reporting period specified in this permit, or sooner if required by the Agency, the permittee shall submit a copy of the upset log entries for the reporting period, as required by Condition G15. [LRAPA 36-025(4)]
- G14. Any excess emissions which could endanger public health or safety shall immediately be reported to the Oregon Emergency Response System (OERS) at 1-800-452-0311.
- G15. The permittee shall keep an upset log of all planned and unplanned excess emissions. [LRAPA 36-025(3) and 36-030(1)] The upset log shall include the following:
- a) date and time each event was reported to the Agency;
 - b) whether the process handling equipment and the air pollution control equipment were at all times maintained and operated in a manner consistent with good practice for minimizing emissions;
 - c) whether repairs or corrections were made in an expeditious manner when the permittee knew or should have known that emission limits were being or were likely to be exceeded;
 - d) whether the event was one in a recurring pattern of incidents which indicate inadequate design, operation, or maintenance; and

- e) final resolution of the cause of the excess emissions.

Upset logs shall be kept by the permittee for two (2) calendar years. [LRAPA 36-025(4)]

Excess Emissions: Scheduled Maintenance

- G16. Where it is anticipated that shutdown, by-pass, or operation at reduced efficiency of production equipment or air pollution control equipment for necessary scheduled maintenance may result in excess emissions, the permittee must obtain prior Agency approval of procedures that will be used to minimize excess emissions. Application for approval of procedures associated with the scheduled maintenance shall be submitted and received by the Agency in writing at least seventy-two (72) hours prior to the event. [LRAPA 36-015(1)] The application shall include the following:
- a) the reasons explaining the need for maintenance, including why it would be impractical to shut down the source operation during the period, and why the by-pass or reduced efficiency could not be avoided through better scheduling for maintenance or through better operation and maintenance practices;
 - b) identification of the specific production or emission control equipment or system to be maintained;
 - c) the nature of the air contaminants likely to be emitted during the maintenance period, and the estimated amount and duration of the excess emissions, including measures such as the use of overtime labor and contract services and equipment that will be taken to minimize the length of the maintenance period; and
 - d) identification of specific procedures to be followed which will minimize excess emissions.
- G17. No scheduled maintenance which is likely to result in excess emissions shall occur during any period in which an Air Pollution Alert, Air Pollution Warning, or Air Pollution Emergency has been declared, or during an announced "Stage I Red" woodstove advisory period, in areas determined by the Agency as PM₁₀ Nonattainment Areas. [LRAPA 36-015(4)]
- G18. In cases where the Agency has not received notification of scheduled maintenance that is likely to cause excess emissions within the required seventy-two (72) hours prior to the event, or where such approval has not been waived pursuant to LRAPA 36-025(2), the permittee shall immediately notify the Agency by telephone of the situation, and shall be subject to the requirements of Conditions G12 and G13. [LRAPA 36-015(5)]

Air Pollution Emergencies

- G19. The permittee shall, upon declaration of an air pollution episode, take all actions specified in Tables 1, 2, and 3 of LRAPA's Title 51 and shall particularly put into effect the Agency-approved preplanned abatement strategy for such condition, if applicable. [LRAPA 51-015]

Notification of Construction/Modification

- G20. The permittee shall notify LRAPA in writing and obtain approval in accordance with LRAPA 34-035 before:
- a) constructing or installing any new source of air contaminant emissions, including air pollution control equipment; or
 - b) modifying or altering an existing source that may significantly affect the emissions of air contaminants, or

- c) making any physical change which increases emissions; or
- d) changing the method of operation, the process, or the fuel use, or increasing the normal hours of operation to levels above those contained in the permit application and reflected in this permit and which result in increased emissions.

Notification of Name Change

G21. The permittee shall notify LRAPA in writing, using an LRAPA Application for Administrative Amendment to ACDP form, within 60 days after legal change of the registered name of the company with the Corporation Division of the State of Oregon.

Applicable administrative fees must be submitted with an application for the name change.

Permit Renewal

G22. Application for renewal of this permit must be submitted not less than 60 days prior to the permit expiration date. A Filing Fee, an Application Processing Fee, and an Annual Compliance Determination Fee must be submitted with the application for the permit renewal. [LRAPA 34-035]

G23. The procedure for issuance of a permit shall apply to renewal of a permit. If a completed application for a renewal of a permit is filed with the Agency in a timely manner, prior to the expiration date of the permit, the permit shall not be deemed to expire until final action has been taken on the renewal application to issue or deny a permit. [LRAPA 34-130(16)]

Termination Conditions

G24. This permit shall be automatically terminated: [LRAPA 34-140(2)]

- a) within sixty (60) days after sale or exchange of the activity or facility which requires a permit;
- b) upon change of nature of the activities, operations, emissions, or discharges from those of record in the last application;
- c) within one (1) year after a plant closure lasting continuously for one (1) or more years;
- d) upon issuance of a new, renewal, or modified permit for the same operation; or
- e) upon written request of the permittee.

G25. In the event that it becomes necessary to suspend or terminate this permit due to non-compliance with the terms of the permit, unapproved changes in operation, false information submitted in the application or any other cause, the Agency shall notify the permittee by registered or certified mail of its intent to suspend or revoke the permit. Such notification shall include the reasons for the suspension or revocation. The suspension or revocation shall become effective twenty (20) days from the date of mailing of such notices unless, within that time, the permittee requests a hearing. Such a request for hearing shall be made in writing and shall state the grounds for such a request. [LRAPA 34-140(3)]

G26. Termination of this permit resulting from continuous plant closure shall subject the source to review as a new non-permitted source upon application to operate the facility. [LRAPA 34-140(4)]

G27. If the Agency finds that there is a serious danger to the public health or safety or that irreparable damage to a resource will occur, it may suspend or terminate this permit, effective immediately.

Notice of such suspension or termination must state the reasons for such action and advise that the permittee may request a hearing. Such a request for a hearing shall be made in writing within ninety (90) days of the date of the suspension and shall state the grounds for the request. [LRAPA 34-140 (5)]

G28. Any hearing requested shall be conducted pursuant to the rules of the Agency. [LRAPA 34-140(6)]

G29. The permittee shall submit, by April 20 of each year, the emission inventory form provided by the Agency.

DW/bp [revised 10/24/01, 3/26/06]
