

BASIC
AIR CONTAMINANT DISCHARGE PERMIT

Lane Regional Air Protection Agency
1010 Main Street
Springfield, OR 97477
(541) 736-1056

This permit is being issued in accordance with the provisions of LRAPA's Rules and Regulations and based on the land use compatibility findings included in the permit record.

ISSUED TO:

Precision Aggregate Products Inc.
95700 Territorial Highway
Monroe, Oregon 97456

INFORMATION RELIED UPON:

Application No.: 50779
Date Received: 3/6/2006

COPY

PLANT SITE LOCATION:

Portable Crusher

ISSUED BY THE LANE REGIONAL AIR PROTECTION AGENCY

Merlyn L. Hough, Director

OCT - 8 2010

Dated

Source(s) Permitted to Discharge Air Contaminants (LRAPA Section 37-0020):

Table 1 Code	Source Description	SIC
Part A, 6	Rock, concrete, or asphalt crushing, both portable and stationary more than 5,000 but less than 25,000 tons per year.	1442

1.0 STATEMENT OF PURPOSE

- 1.1 Permitted Activities** The permittee is allowed to discharge air contaminants from processes and activities related to the air contaminant source(s) listed on the first page of this permit until this permit expires, is modified, revoked or rescinded as long as the permittee complies with the conditions of this permit.
- 1.2 Relation to local land use laws** This permit is not valid outside of Lane County, or at any location where the operation of the permittee's processes, activities, and insignificant activities would be in violation of any local land use or zoning laws.

2.0 EMISSION STANDARDS AND LIMITS

- 2.1 Production limits** The permittee is prohibited from increasing production or throughput to 25,000 tons or more per year without first applying for and being assigned to General Air Contaminant Discharge Permit AQGP-008.
- 2.2 Visible emission limits** Emissions from any air contaminant source must not equal or exceed 20% opacity for a period aggregating more than 3 minutes in any one hour. "Opacity" means the degree to which an emission reduces transmission of light and obscures the view of an object in the background.
- 2.3 Work Practices** The use of water sprays or equivalent control is required when the source of minerals to be crushed does not contain adequate moisture to suppress dust conditions.
- 2.4 Fugitive Emissions** The permittee must take reasonable precautions from preventing fugitive dust emissions. Reasonable precautions include, but are not limited to:
- a. Treating vehicular traffic areas of the plant site under the control of the permittee.
 - b. Operating all air contaminant generating processes so that fugitive type dust associated with the operation will be adequately controlled at all times.
 - c. Storing materials collected from air pollution control equipment in a covered container or other method equally effective in preventing the material from becoming airborne during storage and transfer.
 - d. Prompt removal of "tracked-out" material from paved streets.
- 2.5 Particulate** The permittee must not cause or permit the emission of any

- Matter Fallout** particulate matter larger than 250 microns in size at sufficient duration or quantity, as to create an observable deposition upon the real property of another person. LRAPA will verify that the deposition exists and will notify the permittee that the deposition must be controlled.
- 2.6 Nuisance and Odors** The permittee must not cause or allow air contaminants from any source to cause a nuisance. Nuisance conditions will be verified by LRAPA personnel.
- 2.7 Other Regulations** In addition to the specific requirements listed in this permit, the permittee must comply with all other legal requirements enforceable by LRAPA.
- 3.0 RECORDKEEPING AND REPORTING REQUIREMENTS**
- 3.1 Records** The permittee must maintain records of the information identified in Condition 3.2 for at least 2 years from the date of the record.
- 3.2 Reports** The permittee is required to report to LRAPA by **February 15th** of each year the following information:
The amount of rock crushed in Lane County during the previous calendar year.
- 3.3 Permit Renewal** An application to renew the permit is due August 14, 2018.
- 3.4 Relocation Notice** The permittee must not install or operate the facility or any portion of the facility at any new site without first providing written notice to the Permit Coordinator in the LRAPA office. The written notice must include the date of the proposed move, approximate dates of operation, a detailed map showing access to the new site, and a description of the air pollution controls and procedures to be installed, operated, and practiced at the new site. Additional permits may be required if the permittee operates individual components of the facility at more than one site at a time.
- 3.5 Construction or Modification Notices** The permittee must notify LRAPA before adding new or modifying existing equipment to the extent that process equipment is substantially changed or added to, or emissions are significantly changed or increased.
- 3.6 Notice of Change of Ownership or Company Name** The permittee must promptly notify LRAPA of any change of mailing address, company name, or plant ownership. The permit will expire 60 days after a change in the legal entity owning/operating the facility unless application, with appropriate fees, is made to transfer the permit to the new

entity.

- 3.7 Where to Send Reports and Notices** The reports and notices, with the permit number prominently displayed, must be sent to the regional office identified on the cover page of the permit.
- 4.0 FEES**
- 4.1 Fees** The Annual Fee specified in LRAPA Section 37-0020, Table 2, Part 2 for a Basic ACDP is due on **December 1** of each year this permit is in effect. An invoice indicating the amount, as determined by LRAPA regulations, will be mailed prior to the above date.
- 5.0 GENERAL CONDITIONS**
- 5.1 Masking of Emissions** The permittee must not cause or permit the installation of any device or use any means designed to mask the emissions of an air contaminant that causes or is likely to cause detriment to health, safety, or welfare of any person or otherwise violate any other regulation or requirement.
- 5.2 Open Burning** The permittee may not conduct any open burning except when approved by LRAPA in advance.
- 5.3 Asbestos** All activities involving asbestos-containing materials, including, but not limited to, demolition, renovation, repair, construction, and maintenance must be performed by persons certified for asbestos abatement projects. Accumulation of asbestos containing material is prohibited. If you have asbestos questions, contact the LRAPA office identified below.
- 5.4 Permit Availability** The permittee must have a copy of the permit available at all times.
- 5.5 LRAPA Inspections** The permittee must allow the LRAPA's representatives access to the plant site and pertinent records at all reasonable times for the purposes of performing inspections, surveys, collecting samples, obtaining data, reviewing and copying air contaminant emissions discharge records and conducting all necessary functions related to this permit.
- 5.6 Legal Disclaimers** The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private

property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.

**5.7 Permit
Revocation**

This permit is subject to revocation for cause.

541-998-8615

Reports			NSPS	Size	Public Notice
Annual	Semi-annual	Excess Emissions			
X				B	1

1. The proposed permit is a new permit for a new source.
2. The permittee operates a portable rock crusher. A description of the processes, equipment, and activities is provided in the attached application.
3. This facility qualifies for a Basic ACDP because the production will be less than 25,000 tons per year but more than 5,000 tons per year.
4. The facility is located in an attainment area for all pollutants (the facility is outside the Eugene-Springfield Urban Growth Boundary).
5. LRAPA has determined that sources that qualify for a Basic ACDP will not have significant emissions. In most cases the emission will not exceed 5 tons of PM or PM₁₀ or 10 tons of any other pollutant. Therefore, the Basic ACDP does not include Plant Site Emission Limits and it is not necessary to estimate emissions for each individual source.
6. Pursuant to LRAPA Section 37-0056(4), issuance of a new or renewed Basic Air Contaminant Discharge Permit requires public notice in accordance with LRAPA Section 31-0030(3)(a). Therefore, there will be no prior notice or public participation. However, LRAPA will maintain a list of all permit actions processed under Category I and make the list available for public review.
