Re: Cleaner Air Oregon (CAO) Emission Inventory Extension Request

Dear Rebecca Truka:

Lane Regional Air Protection Agency ("LRAPA") received your letter dated June 18, 2021, requesting a second extension to the submittal date for the Cleaner Air Oregon (CAO) Emissions Inventory. LRAPA understands that the Hexion location in Springfield, Oregon has a new owner audit agreement with US EPA related to their Toxic Release Inventory emissions and that US EPA has approved an extension for completing the new owner audit report. LRAPA has confirmed with US EPA that this agreement exists and that an extension has been granted. Based on the criteria listed in OAR 340-245-0030(3)(a)(b), LRAPA approves this extension request as related to the CAO Emission Inventory because the new owner audit report may impact emissions-related information required to be submitted for the CAO Emissions Inventory.

The CAO Emissions Inventory Form ([AQ520](#)) is now due by December 1, 2021, under the authority in OAR 340-245-0030(3).

Please note that the second extension request letter indicates that Hexion will be conducting testing to further refine the inputs and emission calculations for TRI reportable chemicals. Hexion should review any test protocols with LRAPA to ensure the results will be acceptable under the CAO program.

Please contact LRAPA to clarify any questions you may have regarding the emissions inventory and risk assessment process. LRAPA appreciates Hexion's efforts in complying with Cleaner Air Oregon.

Sincerely,

Max Hueftle, P.E., BCEE
