RE: LRAPA Source Number 208935  
Request for Extension

Dear Ms. Eagleson,

As you know, the Willamette Valley Company, LLC, is working with you to develop the emissions inventory that will be used to perform a risk assessment for our facility as part of the Cleaner Air Oregon program. We subsequently met with LRAPA on July 29th, 2021 and have corresponded closely thereafter to reach a resolution as to how to best estimate our emissions.

Given our mutual understanding and agreed approach to Equation 8.4-1 from *Methods for Estimating Air Emissions from Paint, Ink, and Other Coating Manufacturing Facilities (Volume II)* issued by the US EPA in February 2005, the company will be able to include new inputs (water for water-based products and the major formulation component for non-aqueous products) to the liquid mole fraction calculation methodology, and resubmit an updated inventory by 5 PM on August 18, 2021. For this reason the company requests an extension for resubmission to that same date and time.

Thank you for your consideration. We are hopeful that this extension will be adequate to ensure an accurate emissions inventory. If you have any questions about this request, you are welcome to contact me or my colleague Sudip Chowdhury, Director of Research & Development.

Sincerely,

Sarah France  
Director of Regulatory Affairs
