Updates on facilities progressing through Cleaner Air Oregon

The Lane Regional Air Protection Agency has updated the progress of facilities moving through the Cleaner Air Oregon program. Below is a brief description of the updates. View relevant documents and full details by visiting each facility's specific webpage.

Hexion, Inc.

<https://www.lrapa.org/329/Hexion-Inc>

Hexion requested the Emissions Inventory due date be moved from December 1, 2021, to December 10, 2021, to align with a December 10, 2021, due date listed in Stipulation and Final Order (SFO) No. 21-3839 signed on September 3, 2021.

SFO No. 21-3839 established a process for Hexion to evaluate its Hazardous Air Pollutant (HAP) emissions to determine if the potential to emit equals or exceeds 10 tons per year for any individual HAP or 25 tons per year of cumulative HAPs. This SFO established a due date of December 10, 2021, for Hexion to submit this Hazardous Air Pollutant Evaluation to LRAPA.

LRAPA approved Hexion's request. The new due date for the facility's emissions inventory is December 10, 2021.
