## **PUBLIC INFORMATION – Travis Knudsen**

### **On-Going**

October was another busy month for LRAPA's public affairs department.

Work continues on the Holiday Farm Fire cleanup. LRAPA's Board of Directors approved a variance on Asbestos Rules during a special October 9<sup>th</sup> board meeting. Public Affairs worked to make this variance known to the communities impacted by the fire. Our [webpage for Asbestos Abatement after a wildfire](#) is frequently updated as new information is obtained.

To spread awareness off this variance and other important asbestos cleanup information, a [Fact Sheet](#) was created and delivered to the McKenzie Community Development Corporation, as well as to Tim Laue, and Marilyn Cross – community members recommended by Board Member Jeannine Parisi. Aaron Speck, compliance officer with LRAPA, also spent time in the McKenzie River area providing our fact sheets and answers questions from community members as he encountered them.

LRAPA was engaged with DEQ as cleanup work began. LRAPA will remain engaged into November and beyond. Multiple staff participate in weekly calls to hear updates, as well as provide updates, on work conducted in communities impacted by 2020 wildfires.

October saw significant progress made to LRAPA's Cleaner Air Oregon webpages. As of Oct. 30, 2020, [JH Baxter](#) and [Seneca Sustainable Energy](#)'s facility specific webpages are live. Other facilities called into the Cleaner Air Oregon program will see their specific webpage become live in the coming weeks. These pages include maps of the facility, images, and documents detailing their progress through the CAO program.

Public affairs staff presented to a First-Year Interest Group (FIG) class at the University of Oregon. This presentation described the regulatory role LRAPA plays in local government. FIG classes are intended to expose to first year college students to different types of work as they consider majors at the university.

A large portion of public affairs work in October focused on the Targeted Airshed Grant/Oakridge Air. Public affairs staff was in Oakridge during an air filter distribution day at Orchid Health. This event presented an opportunity to talk about Oakridge Air directly with community members as they received their HEPA filter. Details of a community meeting for Oakridge air was also provided with an encouragement to attend.

Public affairs helped conduct that community meeting for the Oakridge Air, which took place on October 29<sup>th</sup>. Due to pandemic precautions this meeting was a hybrid in-person/virtual meeting. Community members could choose to participate on Zoom or watch the presentation at the Willamette Activity Center in Oakridge. This meeting covered the health impacts of smoke, provided an update on Oakridge Air's programs, described the creation of a smoke safety plan for the area. The meeting also explained how Oakridge may become a Firewise community to defend against wildfires.

Public affairs staff has begun work on an Indoor Air Quality webpage. This webpage will describe how to best improve indoor air quality as well as provide useful links to other resources. Such as directing to the Oregon Health Authority who is directed by the Oregon Legislature to provide public information and other program on indoor air quality.

### **LRAPA work with Partner Agencies on Asbestos Cleanup**

Three LRAPA staff members are involved in coordinating with federal, state, and local agencies to receive and provide updates on wildfire cleanup across Oregon. Staff remained in frequent contact with Lane County Short Mountain and Lane County Waste Management answering cleanup and disposal questions. As well as offering guidance on new information received from DEQ/FEMA. About five to ten hours a week were spent communicating vendors and waste management. Staff also participated in near-daily asbestos meetings with DEQ to discuss issues around debris cleanup.

Including establishing the variance to LRAPA's asbestos rules passed by the Board in a special October 9<sup>th</sup> board meeting. Staff continue to participate in weekly asbestos meetings with DEQ which has expanded to encompass cleanup efforts in water and land quality. Information gained from these meetings is shared with any who contact LRAPA with cleanup questions.

#### **Future LRAPA work for wildfire cleanup**

Most of the Asbestos Containing Waste (ACW) will be disposed of during the Step 2 cleanup process. LRAPA staff remain actively engaged in this planning process of Step 2. As plans become established LRAPA will actively outreach to those in the McKenzie River communities to explain how they can participate in and benefit from these efforts.
