

**Source Category Description:**

Sawmill and millwork facilities producing less than 25,000 board feet per shift of finished product and veneer peeling and plywood manufacturing. Activities include sawing, debarking, chipping, planing, sanding, veneer production, kiln drying, cabinet and structural wood manufacturing, surface coating, and supporting activities such as material conveyors (mechanical and pneumatic), veneer dryers, plywood presses and boilers.

**1. Qualifications:** For each qualification statement listed below, answer “yes” or “no” in the far right column.

a. Do your facility operations meet the description provided above?	
b. Does the facility use a steam-generating boiler? (If yes, a completed Form AQ 224 (if hogged fuel fired) or Form AQ 208 (for gas, diesel, or oil fired) must be attached.)	
c. Are wood-drying kilns used? (If yes, a completed Form AQ 225 must be attached.)	
d. Are cyclones used? (If yes, a completed Form AQ 226 must be attached.)	
e. Are baghouses used? (If yes, a completed Form AQ 304 must be attached.)	
f. Does the facility have a veneer dryer? (If yes, a completed Form AQ 221 must be attached.)	
g. Does the facility apply paint or other type of coating onto products? (If yes, a completed Form AQB 018 must be attached.)	
h. Are there any additional operations onsite, other than wood products manufacturing? (If yes, provide a brief description below.)	
i. Does the facility have the proper land use approvals? Stationary Sources must attach a completed Land Use Compatibility Statement.
