NOTIFICATION OF COMPLIANCE STATUS Paint Stripping and Miscellaneous Surface Coating

Area Source Rule Subpart HHHHHH

40 CFR 63.11169 - 63.11180

This form may be used to meet the Notification of Compliance Status requirements of Subpart HHHHHH. (Please fill out a separate form for each location you are certifying)

Street address (physical location) of your operation or facility:			
Street	City	State	Zip
Mailing address (if different from #2 above):			
Street	City	State	Zip
nformation about the owner, operator or other cert	fying company official	who will be signin	g this form:
Certifying Official's Name (Please print):		Owner? Yes	□ No □
f not the owner, please provide your title:			
Telephone number: (
Email:			
 CFR 63.11173(a) through (d) 1. I am performing management practices to minim Evaluating the need to strip parts, evaluating altern reduce emissions (if heat required-use less heat), p. 2. I maintain copies of my appual MeCl paint stripped. 	atives, reducing evapora roper storage and dispos	tion of stripper, usin sal (use closed, air-t	
1. I am performing management practices to minim Evaluating the need to strip parts, evaluating altern	atives, reducing evapora proper storage and dispose or usage on site at all time ontaining the information	tion of stripper, usin sal (use closed, air-t es in #1 above	tight containers).
 1. I am performing management practices to minim Evaluating the need to strip parts, evaluating altern reduce emissions (if heat required-use less heat), p 2. I maintain copies of my annual MeCl paint stripped you use more than 1 ton per year of MeCl: A "written" minimization plan has been developed on the company of the comp	atives, reducing evapora proper storage and dispose er usage on site at all time ontaining the information are used outlining the co application of coatings, and oth, preparation station, of criteria in 63.11173(e)(2) mized mist or spray of class in 63.11173(e)(4).	tion of stripper, using sal (use closed, air-tes) es in #1 above mpany's minimization maintenance of sor mobile enclosure (iii), (e)(2)(iii) and (e)(2) (eaning solvent and ure (HVLP) spray gu	on plan spray equipment fitted with filters 2)(iv). paint residue
1. I am performing management practices to minim Evaluating the need to strip parts, evaluating altern reduce emissions (if heat required-use less heat), p. 2. I maintain copies of my annual MeCl paint stripped fyou use more than 1 ton per year of MeCl: A "written" minimization plan has been developed of Signs are posted in all areas where MeCl strippers Surface Coating Operations OCFR 63.11173(e) through (g) Painters are trained and certified in proper set-up, and All spray-applied coatings are applied in a spray boothat achieve 98% capture efficiency. See additional All paint spray gun cleaning is done to avoid an atto outside of a collection container. Additional example All spray-applied coatings are being applied using a application, air-assisted airless spray gun, airless secretification of Compliance	atives, reducing evaporal proper storage and disposer usage on site at all time ontaining the information are used outlining the complication of coatings, and oth, preparation station, coriteria in 63.11173(e)(2) mized mist or spray of cles in 63.11173(e)(4). In high volume, low pressuring gun, or an equivaler	tion of stripper, using sal (use closed, air-test es in #1 above mpany's minimization of maintenance of sor mobile enclosure (ii), (e)(2)(iii) and (e)(2) eaning solvent and ure (HVLP) spray gunt technology.	on plan spray equipment fitted with filters 2)(iv). paint residue
1. I am performing management practices to minim Evaluating the need to strip parts, evaluating altern reduce emissions (if heat required-use less heat), p. 2. I maintain copies of my annual MeCl paint stripped fyou use more than 1 ton per year of MeCl: A "written" minimization plan has been developed of Signs are posted in all areas where MeCl strippers Surface Coating Operations OCFR 63.11173(e) through (g) Painters are trained and certified in proper set-up, and All spray-applied coatings are applied in a spray both that achieve 98% capture efficiency. See additional All paint spray gun cleaning is done to avoid an attempt outside of a collection container. Additional example All spray-applied coatings are being applied using a application, air-assisted airless spray gun, airless sertification of Compliance I am certifying that my operation or source is in compliance	atives, reducing evaporal proper storage and disposer usage on site at all time ontaining the information are used outlining the complication of coatings, and oth, preparation station, of criteria in 63.11173(e)(2) mized mist or spray of cles in 63.11173(e)(4).
