Re: Cleaner Air Oregon Extension Request

Ms. France:

LRAPA received written notification from The Willamette Valley Company, LLC (WVCO) on March 23, 2020 requesting an extension of time for the submittal of the Emission Inventory. LRAPA called WVCO into the Cleaner Air Oregon (CAO) program on March 2, 2020. The Emission Inventory was due on June 1, 2020. The extension request submitted by WVCO to LRAPA on March 23, 2020 outlined the following active steps that have been taken to prepare the Emission Inventory:

1. WVCO has retained an environmental consultant to assist the facility with each step of the CAO process, including the Emission Inventory submittal.
2. The consultant has visited the site multiple times.
3. WVCO staff have supplied and reviewed extensive amounts of production data as well as zoning considerations at the site.

LRAPA understands and appreciates the complexity and volume of the expected analysis, while also recognizing the current strain on facilities due to the uncertainty of potential impacts of the COVID-19 pandemic on current and future production activities. LRAPA grants the extension to allow additional time to complete the Emission Inventory by the facility's elected date of June 22, 2020.

This approved extension presumes that WVCO will communicate any questions or clarifications regarding the Emission Inventory in order to provide a timely and complete submittal. LRAPA is available to collaborate with WVCO during this time to review sequenced sections of the Emission Inventory and underlying preparatory work. Please let me know if you need any additional assistance in this matter.

Sincerely,

Max Hueftle
Permit Section Manager
