RE: LRAPA Source Number 208935  
Request for Extension

Dear Ms. Eagleson,

As you know, the Willamette Valley Company, LLC, is working with you to develop the emissions inventory that will be used to perform a risk assessment for our facility as part of the Cleaner Air Oregon program. By letter dated June 28, 2021, LRAPA provided us with several questions and comments related to the inventory, including application of Equation 8.4-1 from *Methods for Estimating Air Emissions from Paint, Ink, and Other Coating Manufacturing Facilities (Volume II)* issued by the US EPA in February 2005. You had requested that we respond with an updated inventory addressing the questions and comments by July 16, 2021.

We subsequently met with LRAPA on July 13<sup>th</sup>, 2021 and have corresponded closely thereafter to reach a resolution as to how to best estimate our emissions. I believe that we have resolved all questions other than the question related to the fill calculations. We look forward to continuing work with LRAPA to come to a resolution on this matter and finalize our inventory. However, given the technical complexity of the fill calculations, it does not appear possible to resolve these questions and resubmit the inventory by the stated deadline. For that reason, we request an extension to 5 pm on July 30, 2021.

Thank you for your consideration. We are hopeful that this extension will be adequate to ensure an accurate emissions inventory. If you have any questions about this request, please call me.

Sincerely,

A handwritten signature in black ink that reads "Sarah France".
