Re: PID Readings

Dear Mr. Morrisey

This letter is in regard to section 16 of Permit number 200502 for J.H. Baxter & Co. J.H. Baxter & Co. would like to request that the PID readings that are required 90 days after carbon replacement and monthly thereafter, be discontinued.

As you are aware, J.H. Baxter & Co. is no longer operating its Eugene, OR wood treatment facility and therefore, there are no emissions going into or out of the carbon absorption unit. This was evident on the last two PID reading performed by LRAPA with Scott Thielke our EH&S manager where low values were tested on both the influent and effluent stacks on the system. In addition, we request permission to turn off the blower and carbon unit since we are not operating the treatment plant.

We hope you will consider this request.

Sincerely,

Georgia Baxter
