Re: Cleaner Air Oregon (CAO) Extension Request

Dear Doug Maples:

LRAPA received written notification from Emerald Forest Products Plant #1 (EFP#1), LRAPA Source Number 202528, requesting a one-month extension of time for the submittal of their CAO Emissions Inventory.

LRAPA called EFP#1 into the Cleaner Air Oregon (CAO) program on December 15, 2021. The Emission Inventory was due on March 15, 2022. EFP#1 submitted an extension request to LRAPA on March 4, 2022 outlining the following active steps to prepare the Emissions Inventory:

1. EFP#1 has contracted an environmental consultant to assist the facility with the Emissions Inventory
2. The environmental consultant has made regular site visits and has conducted document reviews to compile the Emissions Inventory information including a review of past air reporting including the Air Toxics Emissions Inventory (ATEI) submitted to LRAPA in September 2021 for the 2020 calendar year
3. Progress has been made towards the completion of the Form AQ520 for the Emissions Inventory
4. All Safety Data Sheets (SDSs) have been compiled
5. Drafting of process flow diagrams has been initiated

LRAPA approves EFP #1's one-month extension request. A complete CAO Emission Inventory must be submitted to LRAPA no later than Friday, April 15, 2022. This LRAPA-approved extension presumes EFP#1 will communicate any questions or clarifications to provide a timely and complete EI submittal. LRAPA is available to collaborate with EFP#1 during this timeline to review sequenced sections of the Emission Inventory and underlying preparatory work.

Please contact LRAPA to clarify any questions you may have regarding the emissions inventory and risk assessment process. We look forward to working with you.

Sincerely,

Max Hueftle, P.E., BCEE
