Regarding: Extension Request
Cleaner Air Oregon Reporting
Emerald Forest Products, Plant #1
118 Highway 99N
Eugene, Oregon

Dear Mr. Hueftle:

Emerald Forest Products, Inc. requests an extension to the deliverable deadline for the Cleaner Air Oregon Program reporting due March 15, 2022. We request a one-month extension to the deadline, to April 15, 2022, under OAR 340-245-0030(3) and under the following reasoning:

- Emerald Forest Products has contracted an environmental consultant to assist in preparing the requested reporting documents; PBS Engineering and Environmental is on contract to environmental consulting assistance.
- The consultant's workload and availability, due at no fault to Emerald Forest Products, Inc., has not allowed for a timely preparation of documents with enough lead time for internal review prior to submittal.
- Emerald Forest Products has demonstrated progress in completion of reporting tasks by the following steps;
 - Completion and submittal of the CAO Pre-Application Form AQ100CAO and Fee
 - Contracting an industry recognized environmental consultant
 - Regular site visits and document review by PBS in an effort to compile reporting information
 - Consultant progress towards completion of the AQ520 reporting forms
 - Compiling of all facility SDSs
 - Consultant review of existing air reporting (ACDP and ATEI Inventories)
 - Development of draft level process flow diagrams

We appreciate your attention to this request and look forward to your response. Please feel free to contact me at 541-683-1986 or dmaples@emeraldforestproducts.com with any questions or comments.

Sincerely,

Doug Maples
Vice President of Plywood Manufacturing
