Re: LRAPA Approval of Cleaner Air Oregon Emissions Inventory Updated March 24, 2023

Dear Doug Maples:

LRAPA has completed the review of the Cleaner Air Oregon Emissions Inventory (AQ520 Form) submitted by the facility on March 24, 2023 for Emerald Forest Products – Plant #1 (EFP1- Source Number 202528). The March 24, 2023 submittal from EFP1 was in response to LRAPA's March 6, 2023 request for updates to the Cleaner Air Oregon Emissions Inventory (CAO EI - AQ520 Form) submitted on December 2, 2022. The emissions inventory submitted on March 24, 2023 is approved by LRAPA with this letter.

The next step in the CAO review process is for EFP1 to begin a risk assessment of the facility. The submittals required for the risk assessment are based upon the risk assessment level EFP1 chooses to complete. Submittals required under the risk assessment process are listed in [OAR 340-245-0030\(1\)\(b\)](#) through (f). For example, under a Level 3 Risk Assessment, EFP1 must provide LRAPA the following submittals by the dates indicated:

- A modeling protocol no later than May 17, 2023. Modeling protocol requirements are listed in [OAR 340-245-0210\(1\)\(a\)](#).
- A risk assessment work plan (RAWP) no later than June 16, 2023. RAWP requirements are listed in [OAR 340-245-0210\(2\)](#).

Please let me know if you need any further information or assistance, or if you would like to meet to discuss. Failure to provide additional information, corrections or updates required by LRAPA may result in a violation of [OAR 340-245-0030\(1\)](#). LRAPA appreciates EFP1's efforts in complying with Cleaner Air Oregon.

Sincerely,

Max Hueftle, P.E., BCEE
Operations Manager
